

GROBET Carbide Bur Special

GROBET BEAR BURS were designed specifically to handle the tough requirements of metal fabrication where high tool pressure and rough handling are the rule.

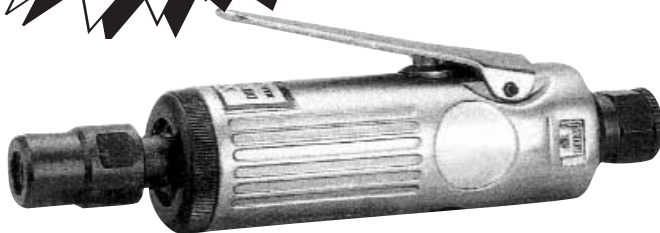

- engineered for shipyards and heavy duty applications
- design and cut removes more material per hour
- more durable due to the strength of the teeth
- more resistant to chipping
- wider teeth makes longer chips so it breaks up easier
- the geometry of the teeth are less prone to filling up with chips

1/4", 6mm shanks

GROBET BEAR BURS

Part #	Dia	SCTI	Description
32.555SY	1/2"	SA5	Cyl/Plain
